Creative Sounds Entertainment Hearing Aid Audio Connections

BA210 HomeSpot Password: creative

After the last meeting Joe Wread approached me, informing me that it was often difficult to hear what is being put out. He told me about a theater he recently went to that was broadcasting the movie's audio out to the audience via Bluetooth to hearing aids. He also told me that he would be willing to purchase said technology should I find something to support this during our meeting. I was very surprised to hear this personally, as I was unaware of the use of this. I am happy to announce that I have found such a device! I have replaced this device and will have it for the meeting for August 4th. Here are some details about the device I will be setting up, so you can be prepared:

HomeSpot BA210 v2 Bluetooth Auracast Transmitter, LC3, AptX Lossless, AptX HD, Optical & 3.5mm

Inputs, Compatible with Galaxy Buds 2 Pro, Buds 3, JY300 JM320, Hearing Aids and Bluetooth Headphones.
